OLAV & Co. is an industry leading expert on Enterprise Data systems with 30 years' experience providing migrations, conversions, implementations and custom software development to Fortune 1000 companies and governmental entities.

OLAV provides software products and consulting services for organizations installing, upgrading, or converting to Hitachi's Asset Suite application software.

"All projects were completed on schedule and under budget due…to the skills of the OLAV employees…. OLAV staff and my staff worked seamlessly…They are professional in every way…OLAV…may be the best project decision we have ever made. I would unequivocally recommend them for any data conversion, programming or inventory clean-up work you…have."
Project Director, Information Systems

REPORTING & ANALYSIS

In addition to the technical expertise, OLAV's contextual knowledge of the data allows for powerful reporting on your data.

PROJECT MANAGEMENT

OLAV personnel have been working on EAM projects (of all capacities) since 1995. With our expertise in this area, contextual knowledge of the data, and experience managing jobs, your project is in good hands with us.

Olav is known for completing projects on time and within initial budget with quality results and few to zero postproduction issues.

Optimize Results with OLAV's Asset Suite Study Services

At OLAV, we provide a structured study approach that enables you to assess the effectiveness of Asset Suite within each of your functional areas. Our goal is to help you maximize your investment, align Asset Suite with your strategic plan for future growth, and ultimately increase your bottom line by controlling costs.

Customizable Approach for Your Business Goals

We understand that every business is unique, which is why our services are fully customizable to meet your specific needs. Starting with a comprehensive assessment of your current version(s) of Asset Suite, we analyze its functional uses and identify optimization opportunities. We also take the time to fully grasp your strategic vision, goals, and roadmap.

Installing Asset Suite & initial regions

OLAV has successfully installed initial Asset Suite regions on virtually every version of the software since inception, including its 9.6 version. After these initial installations were complete, these regions successfully received client-specific Asset Suite data.

Asset Suite Help Desk Support

By utilizing OLAV Sr technical staff for your Asset Suite help desk support, you can enhance your in-house IT knowledge base and expertise, allowing your internal team to focus on strategic projects. With increased availability and rapid issue resolution, OLAV's Sr. technical staff ensures higher levels of customer satisfaction and flexible end-user IT support, ultimately improving productivity and reducing overhead.

Asset Suite Maintenance

- Transactional data cleanup.
- Batch job monitoring & server processing.
- System configuration changes.
- Define, develop, analyze, & modify tailoring & customizations.
- Provide top level technical expertise in troubleshooting, including logic/coding errors which cause application software failures & performance issues.
