

Asset Suite Study

OLAV is the longest Serving U.S. Asset Suite/PassPort Specialty Company
A Hitachi Energy Asset Suite Service Partner

Asset Suite Study

DATA COLLECTION

EAM solutions should provide as many data input options as needed to meet the constraints/limitations of your business and all users needing to collect, manage and report data.

INTEGRATIONS

Ensure any solution you aim to use across your business can integrate with other enterprise software solutions for security, reporting, and overall efficiency reasons.

Flexible Scope Options - Our scope options cover a wide range of considerations, including but not limited to:

- ✓ Assessing customizations, interfaces, specialty reports, spread sheets, and data integrity.
- ✓ Evaluating third-party applications/bolt-ons to reduce overhead expenses and minimize support and maintenance costs.
- ✓ Assessing readiness for an upgrade to the Lumada-ready version 9.6.4 platform.
- ✓ Providing fair pricing based on factors such as the number of existing instances of Asset Suite, Asset Suite modules, locations, and other customizable variables like third-party applications/bolt-ons, customizations, interfaces, and historical data.

OLAV's approach will work for existing Asset Suite customers or customers that are new to Asset Suite:

- When working with existing Asset Suite users, we will discuss any concerns with current module functionality or latest version updates to a module's baseline functionality.
- When working with users that are new to Asset Suite, we will provide an overview of the baseline module functions and discuss how the client can incorporate/improve existing business processes with them.
- When working with existing customers that are considering merging another EAM system into their current version of Asset Suite, the Asset Suite Study would include an assessment of the EAM functions and ease of use to compare to Asset Suite. This assessment also includes the assessment of the other EAM systems customizations, data structure and interfaces.

EXPERTISE

The Asset Suite Study is conducted by our dedicated team of experts, including a principal, project manager, business analysts, and IT staff.

COLLABORATION

We collaborate closely with your team every step of the way!

Starting with the coordination of planning meetings, identifying subject matter experts to conducting workshops that cover module functions, interfaces, data, customizations, and user-specific documentation.

Optimize Results with OLAV's Asset Suite Study Services

At OLAV, we provide a structured study approach that enables you to assess the effectiveness of Asset Suite within each of your functional areas. Our goal is to help you maximize your investment, align Asset Suite with your strategic plan for future growth, and ultimately increase your bottom line by controlling costs.

Customizable Approach for Your Business Goals

We understand that every business is unique, which is why our services are fully customizable to meet your specific needs. Starting with a comprehensive assessment of your current version(s) of Asset Suite, we analyze its functional uses and identify optimization opportunities. We also take the time to fully grasp your strategic vision, goals, and roadmap.

Streamlined Process

We understand that time is of the essence, which is why we work efficiently to ensure a smooth process. Our assessment time varies based on scope, with a minimum timeline of 6 weeks assuming a basic scope and availability of resources for workshops. We utilize all necessary resources, including workshops and access to relevant information, to prepare a thorough assessment.

A Vision for Your Success

Our study concludes with a closeout meeting where we deliver and discuss our findings and recommendations.

Embark on the journey to maximize the capabilities of Asset Suite with OLAV's Asset Suite Study Services.

Other OLAV Asset Suite Service Offerings:

- Asset Suite System Maintenance
- Data Conversion/Migration Services
- Asset Suite Help Desk Services
- Asset Suite Multi-Version Upgrades
